No. $\frac{\text{S. B.}}{1994}$ OF 1904.

From

SURGEON-GENERAL W. McCONAGHY, M.D., I.M.S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Bombay, 4th July 1904.

Sir,

I have the honour to submit, for the information of Government, my Annual Report on the Civil Hospitals and Dispensaries of the Bombay Presidency for the year 1903.

2. On 31st December 1902 there were 638 institutions open. During the year under review 22 new ones (5 State-aided, Municipal and Local Fund, and 17 Private) were added, and 16 (1 State, 2 Railway and 13 Private) were closed. The Mrs. P. DeSouza Dispensary at Uran and the C. F. Parekh Dispensary at Surat were transferred from Class II to Classes I and III-B, respectively. At the end of the year 644 institutions were open. This is, on the whole, very satisfactory. In a large number of localities European medical aid is thus brought within the reach of a vast number of the population. The attendance points to the appreciation in which this privilege is held. Still large tracts are left unprovided, and it is disappointing to think that private enterprise does not step in and help. Numbers of students pass out from the various schools and colleges yearly, who too often settle in the larger cities already well supplied with medical aid, leaving the rural districts entirely without medical help. There is a field open, a healthy active life awaiting the private practitioner who could be induced to leave the cities and go further afield.

3. The total number of patients treated during the year under report was 4,032,441, as compared with 4,031,185 in 1902, showing an increase of 1,256. Of these, 67,066 were in-door and 3,965,375 out-door patients against 67,377 in-door and 3,963,808 out-door patients in the previous year. The Civil Hospitals and Dispensaries mentioned in Statement No. II show a decrease of 887 and 22,931 in the number treated of in-door and out-door patients, whereas there is an increase of 921 and 34,694 cases respectively at institutions returned in Statement No. III-A. The out-door attendance at the Railway and Telegraph Dispensaries (Statement No. III-B) rose from 149,999 to 156,122, but the in-door admissions were fewer by 345. The total number of beds available was 6,724, as compared with 6,335 in 1902. The ratio per cent. of males treated was 66·0 and of females 34·0 against 66·3 and 33·7 respectively in the preceding year.

4. Malarial fevers were, as usual, the most numerous. Next, in order of frequency, come skin diseases including ulcers, bowel complaints, eye diseases, worms, respiratory diseases, rheumatic affections, diseases of the ear and venereal affections.

The decrease of 144,363 cases was mainly due to a decline of the following diseases :—cholera, dysentery, malarial fevers, venereal affections, worms, rheumatic affections, eye diseases and bowel complaints, whereas there was an increase of 145,619 cases in admissions from small-pox, tuberculous diseases, scurvy, cancer, debility and anæmia, all other general diseases, ear and respiratory affections, diseases peculiar to women and skin diseases including ulcers. The cases of venereal diseases treated numbered 100,113 as compared with 111,522 in 1902.

Preventive medicine has still much to accomplish in India. The conditions of the people, their manners and customs render the task an almost impossible one. Take for instance malarial fevers, which are, as usual, and it is to be feared, will always remain, the most numerous cause of admission. While some thing can be done by attacking the mosquito in cantonments (and even there with not always a great amount of success), a large percentage of the populace must ever be exposed to the infection. The sale of quinine does good in individual cases, but the incidence of the disease will be but little affected thereby. The return of tuberculous cases likewise tells its sad tale,—on the other hand it is satisfactory to note that cholera has not been so prevalent. Improved sanitary surroundings, a better water-supply, have undoubtedly diminished the epidemics, once so regular and so constant a feature in the health conditions of the people. Dysentery, diarrhœa and diseases of the digestive system are accountable for a very large number of admissions, no doubt the results of the past years of scarcity and privation. It could hardly be expected that so much suffering would not leave its mark. As matters improve, with food good and plentiful, a diminution in the prevalence of these and other diseases may reasonably be expected.

5. The total number of surgical operations performed in the Civil Hospitals and Dispensaries included in Statement No. III show a decrease of 2,253, *viz.*, 84,558 against 86,811. The decrease was amongst the minor operations, the major operations were slightly larger in number and equal in importance to those performed in the previous year. The patients operated on numbered 84,049, of whom 67,901 were cured, 1,434 relieved, 1,006 discharged otherwise and 490 died. There were 1,919 tumours and cysts excised. Operations on bones and joints numbered 2,168. Of the amputations, 522 were for injury, 261 for diseases and 15 for deformities; and, of the total, 45 ended fatally. The operations on the eye and its appendages included 125 iridectomies, 67 sclerotomies, 944 extraction of lens, 100 excisions and eviscerations of the eyeball and 45 lacerations and extractions of the opaque capsule. Of the operations on the thorax and breast, 14 were for excision of the breast with 2 deaths. The operations on the abdomen included 83 operations for hernia, of which 34 were strangulated with 13 deaths and 49 for radical cure with 2 deaths. In 304 cases the liver was incised for abscess with 59 deaths. Laparotomy was performed in 65 cases resulting in 29 deaths. Among the operations on the bladder and urethra there were 1,489 for removal of vesical calculi and 190 for urethral stricture. The operations for removal of vesical calculi included 948 litholapaxies, 446 lithotomies and 95 lithotrites, and of these, 75 ended fatally. I regret that the number of cutting operations still remains large. Doubtless some were necessary, but I think the comparison between the crushing and the cutting operations points to a deficiency in the instruments for the former. Of the operations on the female generative organs, 10 were ovariotomies with 3 deaths, and 6 abdominal hysterectomies with 2 deaths. Oöphorectomy was performed in one instance and the case remained under treatment at the end of the year. Among the obstetric operations, forceps were applied 89 times. 82 women recovered and 7 died. Version was resorted to in 75 cases with 7 deaths. 39 craniotomies were performed with 2 deaths. Of the 4 cases of cæsarian section, 1 recovered and 3 died. The surgical work done in the Hospitals has been very satisfactory. Steps will be taken to supply lithotrites where they are required. Much has been done already not only in this, but with regard to all instruments. Wooden handle instruments are gradually being replaced by others which stand repeated sterilization. Operation rooms have been improved and where necessary rebuilt, and the danger of septic contamination reduced to a minimum. Several operation rooms, in their construction, arrangements and general management, would compare favourably with most at home and on the Continent, and the general results of the operations performed point to the fact that asceptic surgery is thoroughly understood and extensively practised.

6. The number of patients admitted into the hospitals and subsequently found to be cases of plague was 1,197. Of these, 356 died and 841 were transferred to plague hospitals. The number of cases and deaths from plague

reported to Government in 1903, including those in Native States, are given in the subjoined table :—

		Cases.	Deaths.
Konkan.	Bombay City ...	23,344	20,876
	Mofussil	7,183	5,689
Deccan	.. ..	353,839	266,054
Gujarát	... ...	70,958	52,509
Sind	... ...	3,198	2,702
Foreign	... ...	1	...
Total ...	1903 ...	458,523	347,830
	1902 ...	290,831	215,501

7. Statement No. VI, Part I, treats of the income and expenditure of Government-aided, Municipal, Local and Lady Dufferin Fund Institutions. The total income, exclusive of the cash balance, was Rs. 14,12,979-1-2, of which Rs. 8,18,168-13-2 were grants from Government, Rs. 2,62,406-10-3 from Municipal Funds and Rs. 1,77,146-15-3 from Local Funds. Interest on investments yielded Rs. 41,101-4-5, and subscriptions from Europeans and Natives Rs. 10,293-1-3. Hospital fees amounted to Rs. 69,954-10-5, whilst Rs. 33,907-10-5 were realized from miscellaneous sources, such as the sale of securities, unserviceable articles, &c., &c.

The total expenditure was Rs. 14,17,089-12-8. Deducting therefrom Rs. 1,01,040-12-3 remitted into the Treasury on account of hospital stoppages, sale of unserviceable articles, &c., &c., and Rs. 17,800 invested during the year (total Rs. 1,18,840-12-3), the net cost was Rs. 12,98,249-0-5, and the cost per patient Re. 0-9-9 against Rs. 11,67,177-13-3 and Re. 0-9-0 respectively in 1902. The average cost of each diet was Re. 0-2-7, or the same as in the previous year. Government paid Rs. 7,17,128-0-11, or 55·2 per cent. of the actual expenditure, against Rs. 6,37,092-13-3 or 54·6 per cent. in 1902.

The subjoined table gives particulars regarding the net cost, &c., of the various institutions in the different divisions of the Bombay Presidency during the year 1903 :—

	Net cost.	Cost paid by Government.	Cost per patient.	Percentage of cost paid by Government.	Average cost of each diet.
	Rs.	Rs.	Rs. a. p.		Rs. a. p.

8. The services rendered by Medical Officers, and especially their professional work in connection with hospitals and medical schools, have, for the most part, been highly creditable, and I beg to commend to the favourable notice of Government the names of Lieutenant-Colonels McCloghry, Henderson, Boyd, Monks, Dimmock, J. W. T. Anderson, Stevenson, Lyons, Burke, Collie and Quicke, Majors Dyson, Meyer, Childe and Smith, and Captains Jackson, Evans and Hooton. I can also speak very favourably of Civil Assistant Surgeons Mackenzie, Cardoz, Khán Bahádurs Dadina, Dadachanji and Moos, and Assistant Surgeons Bocarro, Nanavati and Ghandhy, and Military Assistant Surgeons G. C. McMullen, H. A. Lafond, A. E. Almeida and A. V. M. King.

9. I can reiterate my opinion regarding my Personal Assistant Captain J. H. McDonald, M.B., I. M. S., who has performed his duties during the year to my entire satisfaction.

10. My Chief Clerk and most of the other members of the office establishment have worked energetically and well.

I have the honour to be,
Sir,
Your most obedient servant,
W. McCONAGHY, M.D.,
Surgeon-General, I. M. S.,
Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT No. I.

Showing the Classification of the Civil Hospitals and Dispensaries of the Bombay Presidency during the year 1903.

Population of the Province.	Civil Hospitals and Dispensaries.	Number open on 31st December.	Number opened during the year.	Number closed during the year.	Number open on last day of the year.	Remarks.
25,424,235	Class I.—State Hospitals and Dispensaries.	59	(*a*) 1	(*b*) 1	59	(*a*) Uran transferred from Class II to Class I. (*b*) Zaila. (*c*) Mokhada, Kopargaon, Chálisgaon, Herikerúr and Khairpur Nathesa. (*d*) The P. DeSouza Dispensary at Uran and C. F. Parekh Dispensary at Surat transferred from this Class II to Classes I and III-B respectively. (*e*) 8 (Thána District), 1 (Ratnágiri District), 1 (Jhawar State), 1 (Kolhápur State), 3 (Mahi Kántha State) and 3 (Káthiawár States). (*f*) 2 (Bombay City), 1 (Ahmednagar District), 2 (Sátára District), 1 (Pálanpur State) and 7 (Káthiáwár States). (*g*) The C. F. Parekh Dispensary at Surat transferred from Class II. (*h*) Amalner-Jalgaon and Laki.
	Class I (*a*).—Police ...	2	...	...	2	
	Class I (*b*).—Forests and Surveys ...	...	...	...	...	
	Class I (*c*).—Canals ...	...	...	...	...
